Assistant, Associate, or Full
Professor of Medicine**

Microbiology

Position # 39315

The University of Central Florida College of Medicine is seeking enthusiastic and dynamic faculty member to participate in the creation of an integrated, organ system-based curriculum that will prepare physicians for practice in the 21st century. The successful candidate will be a key player on the team developing and delivering the content of an eight-week integrated Health and Disease module encompassing microbiology, immunology and virology in the first year of the curriculum. The candidate will also collaborate with both Basic Science and Clinical faculty to integrate and reinforce microbiology concepts throughout all four years of the curriculum.

The curriculum is the focal point of the UCF College of Medicine's current effort as we build one of the first all-new allopathic medical schools established in the United States in more than 20 years. The medical college has received preliminary accreditation and has admitted the charter class this Fall 2009. By 2010 we will be housed in our new Medical Education building located on the UCF Health Sciences Campus at Lake Nona. This new campus will anchor the burgeoning Medical City at Lake Nona, only the second such site in the world. The City will also include the College of Medicine's Burnett Biomedical Sciences building, the Burnham Institute for Medical Research, Nemours Children's Hospital and a Veterans Affairs Medical Center as well as participation by MD Anderson Cancer Center Orlando and the University of Florida.

This position is a multi-year contract in the Department of Medical Education. Applicants are required to have a doctoral degree in microbiology/immunology or related field and have experience in presenting content in these areas to post-secondary students.

To apply for this faculty position, applicants MUST apply through <https://www.jobswithucf.com/applicants/Central?quickFind=73499> Cover letters, CV/resumes, and other documents can be attached through the <https://www.jobswithucf.com> website.
